

We, the undersigned residents of Wisconsin, respectfully request Governor Doyle and the Wisconsin Legislature to actively pursue legislation to LICENSE, INSPECT and SET STANDARD of HUMANE CARE for pet animals bred and or sold in Wisconsin.

Further, as consumers and concerned citizens, we believe that pet animals are NOT "agricultural products." We believe they require standards of care that are specifically suited for their species and breed. Those standards must include socialization and proper housing, exercise, food, water and veterinary care. PLEASE HELP STOP the Puppy Mill Industry that is growing at an alarming rate here in Wisconsin. It harms people and pets. It's time to protect both.
